**Subject:** RE: Central Sands Dairy - Transfer of EPA Data with PII to Wisconsin Counties

Jenny spoke with Barb and none of them did ☹

Best wishes,  
Heather

I am not sure how many reached out to Juneau County Health Department.

**Subject:** RE: Central Sands Dairy - Transfer of EPA Data with PII to Wisconsin Counties

I do not know the answer to this, but I am happy to call the residents and ask them if Cheryl doesn't know.

My other question is...do we know how many of the residents reached out to give Barb Theis their results since we recommended that in our emails/letters?

Best wishes,  
Heather

Good point, not a lot of wells, but if we don't have money to buy an EDD file from the lab, Brian said it will take a while to put it into Scribe.

Thanks Jenny. Tom is on travel so I am acting for him today.

I think it's critical to point out how very little data we have to transfer – drinking water quality data from 13-18 private wells.

**Matt** – WD would greatly appreciate having these data transferred to Scribe so that we can share the water quality data – especially the nitrate sampling results – with the county health departments. This is a time sensitive issue as we need to ensure that the residents with high nitrate results have access to alternate water. Please let me know if you need anything else.

Best wishes,  
Heather

Enforcement confidential and deliberative. Do not release for FOIAs or discoveries.

Hi Tom and Heather,

Chuck said to give the residents' sampling data to the counties near Central Sands Dairy (CSD), we must put the data into Scribe according to an SOP that ORC has used for other projects. Superfund has experience using Scribe, but for Brian Cooper, the scientist in Superfund, to work on it, he needs my management to tell his manager (Matt Mankowski) that we are requesting that this is done. I am not sure if there are fees involved with having Brian do this work, I will let Matt

address that, but I believe there may be fees for the Wisconsin State Lab to create an EDD file because they don't normally do this.

Cheryl, is there any money left in the funding you received for the CSD project? If yes, how much is there and may it be used to pay the Wisconsin State Lab to put the data in EDD format?

Going forward, Brian and I believe that the SOP ORC is using to transfer PII data needs to be re-evaluated because neither of us believe using Scribe is necessary for these purposes. We both think, given the current computer security situation, the SOP is outdated. If we are planning to do more sampling in Wisconsin, I think this needs to be looked at further so we don't waste Agency resources putting data into Scribe if we don't need to. Brian, if you have more to say or think I mischaracterized your thoughts, please say so.

Thank you,  
Jenny
